

THE CIW WEB DEVELOPMENT SERIES

This series includes the essential combination of a front-end scripting language, a back-end programming language and the skills to integrate them with a database. Because of this diversity, the individual who completes this series will become a valuable corporate IT team member.

CIW Perl Specialist

The CIW Perl Specialist course teaches developers how to fully use the features of the Perl programming language in Web application development. These specialized Web language skills can help you begin or grow a career in advanced Web development and technologies.

Topics include:

- Perl language essentials, including syntax, regular expressions and data types
- Perl code development, including accessing and manipulating files
- Web site implementation, including database connectivity and debugging techniques

Certification Exams

To earn the CIW Perl Specialist certification, individuals must pass one exam:

CIW Perl Specialist exam (1D0-437)

50 questions | 75 minutes

Typical Time to Teach

Secondary	one semester
Higher Education	eight to twelve weeks
Training Providers	one week

CIW — The Industry Standard for Web Technology Education and Certification

CIW is the world's fastest growing vendor-neutral Internet skills training and certification program for students and professionals. More than a certification or a curriculum publisher, CIW is a Web technology standard adopted by academic institutions, governments and businesses worldwide. CIW includes applications and competencies, but our core curriculum focuses on the foundational standards that sustain the infrastructure of IT: Web design, e-commerce, security, networking and databases.
