Database Design Methodology teaches students how to plan and design relational databases. You will learn about the theory behind relational databases, relational database nomenclature, and relational algebra. The course includes sections on Structured Query Language (SQL) and optimizing databases through normalization. You will apply your knowledge with hands-on labs designed to teach the intricacies of database design methodology.

Topics

**Overview of Database Design Methodology**
- Introduction to Database Design Methodology
- Effects of Poor Database Design Practices
- Database Design Phases
- Conceptual Database Design
- Entity-Relationship (ER) Models

**Normalization**
- Introduction to Normalization
- What Is Normalization?
- Normal Forms
- First Normal Form
- Second Normal Form
- Third Normal Form
- Boyce-Codd Normal Form (BCNF)

**Logical Database Design**
- Introduction to Logical Database Design
- Logical Database Design
- Creating a Logical Data Model
- Using a Database Definition Language
- Validating the Logical Data Model
- Defining Integrity Constraints
- Creating an Enterprise Data Model

**Physical Database Design**
- Introduction to Physical Database Design
- Physical Database Design

**Structured Query Language**
- Introduction to Structured Query Language
- SQL Basics
- Data Definition Language
- Data Manipulation Language
- Retrieving Data from Relations
- Data Control Language

**Relational Algebra**
- Introduction to Relational Algebra
- Defining Relational Algebra
- Selection
- Projection
- Cartesian Product
- Union
- Difference
- Intersection
- Joins

**Transactions and Database Security**
- Introduction to Database Transactions and Security
- Transactions
- Concurrency Control
- Database Security

**Target Audience**
Application developers, programmers, enterprise developers, Web developers, and database developers.

**Course Length**
*Database Design Methodology* is an eighteen-hour course.

**Prerequisites**
It is recommended that students have a basic knowledge of the purpose and function of a database. Also, students should be familiar with an operating system such as Microsoft Windows XP before taking this course. The CIW v5 *Database Design Methodology* courseware does not provide entry-level computer literacy.
